

## LED Autolamps is pleased to announce the introduction of our brand new heavy duty Lighting Harness System which is suitable for any type of truck or Trailer.

This new system offers a quick and foolproof method of wiring a Truck or trailer without the need for any special tools.

The harness system comes with a choice of standard cable lengths from 60cm to 15m and incorporates several new specially designed patented push-and-

seal connectors which are rated to IP67 international protection standards. The push-and-seal plugs have been specially designed to be used on hard working vehicles and to be simply and easily installed and provide a 'cost effective' long life lighting harness solution that is extremely tough and durable.

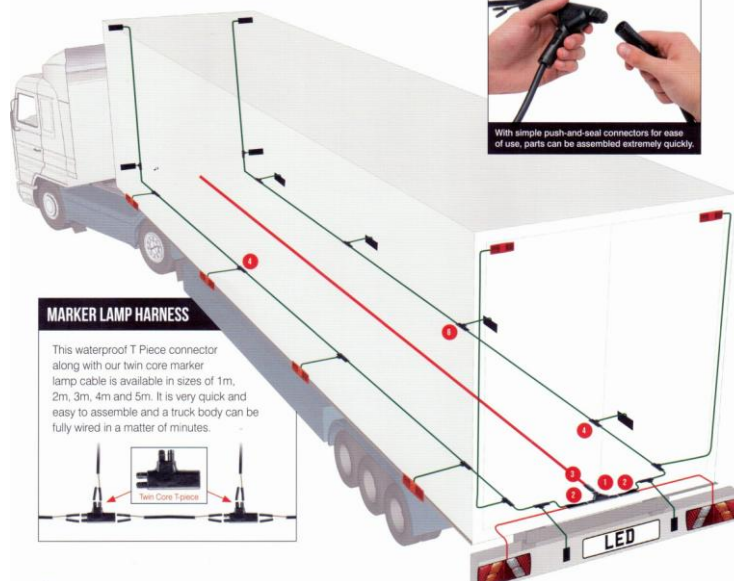

Also offered is a range of LED rear cluster lamps and marker lights which incorporate our push-and-seal connectors which integrates fully with this system.

### PUSH-AND-SEAL SYSTEM

### MARKER LAMP HARNESS

This waterproof T Piece connector along with our twin core marker lamp cable is available in sizes of 1m, 2m, 3m, 4m and 5m. It is very quick and easy to assemble and a truck body can be fully wired in a matter of minutes.

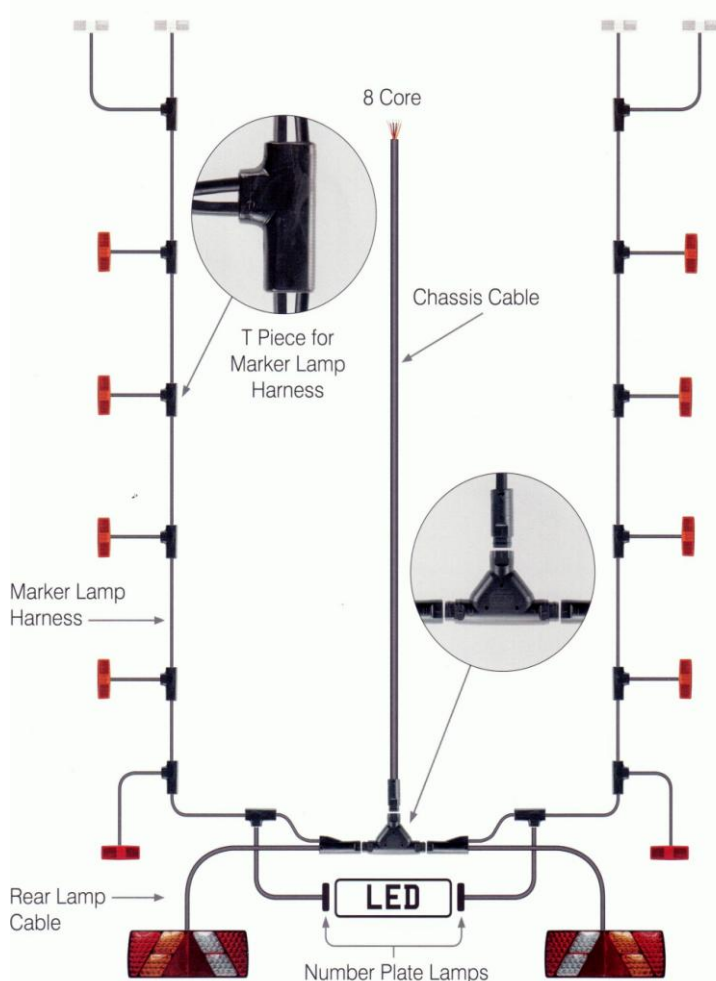

### HARNESS SYSTEM IN DETAIL

The LED Autolamps Push-and-Seal harness system has been designed for all OEM and aftermarket replacement markets on trailers, semi-trailers, truck bodies, buses and construction equipment. The harness system is fully supported by a comprehensive range of LED lamps from our current lighting range that also incorporates our specially designed waterproof connectors.

Also available is lamp cabling with stripped ends so the harness system can be utilised with other types of lighting or electrical equipment.

### WATERPROOF CONNECTORS

A specially patented waterproof sealing ring has been developed and integrated within each individual connector design providing whole system integrity.

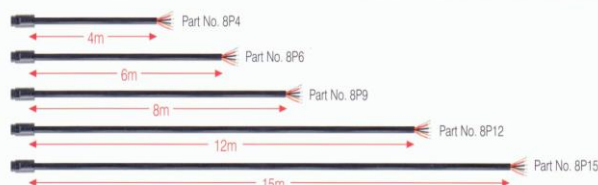

### Harness Plugs

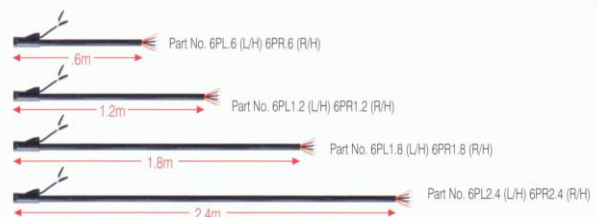

The cabling system couldn't be any easier and simpler to plan and assemble and consists of the following 20 part numbers which are available in various lengths and sizes as shown below. The various cable options makes the system suitable for fitment to a wide range of trailer and vehicle body applications.

- 2 x T Piece connectors
- 5 x 8 core main chassis cables
- 4 x L/H Rear lamp cables
- 4 x R/H Rear lamp cables
- 5 x Marker lamp cables

### Chassis Cables - available in lengths of 4m to 15m

### Rear Lamp Cables - available in lengths of 0.6m to 2.4m

### Marker Lamp Cables - available in lengths of 1m to 5m
